

Table of Contents

Introduction

About this book	Intro-1
Templates to download	Intro-1
About the Author	Intro-1
Configuring your system	Intro-2
Customizing your wheel mouse	Intro-8
System Requirements	Intro-9

Lesson 1

Display Multiple Drawings	1-2
How to configure AutoCAD to display Multiple Drawings	1-2
Warm up drawings	1-4
Exercises 1A, 1B, 1C	1-5
Review Plotting from Model Space	1-8

Lesson 2

Customizing your Workspace	2-2
Creating a Workspace	2-3
Creating a Ribbon tab	2-5
Add a Ribbon Panel to a tab	2-8
Create a New Ribbon panel	2-10
Add a command to a Ribbon panel	2-11
Customize Quick Access Toolbar	2-12
Select a Workspace	2-13
Delete a Workspace	2-14
Export a Workspace	2-15
Import a Workspace	2-16
Customize the Status Bar	2-17
Drawing Status Bar	2-17
Model / Layout tabs	2-17

Lesson 3 Master Decimal Setup

Exercises	
3A - Create a Master Decimal Setup Template	3-2
3B - Create a Page Setup for 8-1/2 X 11 sheet	3-12
3C - Create a Border and Title Block	3-15
3D - Create a Viewport	3-16
3E - Plotting from Layout tab	3-17

Lesson 4 Master Feet and Inches Setup

Exercises

4A - Create a Feet-Inches Setup Template	4-2
4B - Create a Page setup for 8-1/2 X 11 sheet	4-6
4C - Create a Border and Title Block	4-9
4D - Create a Viewport	4-10
4E - Plotting from Layout tab	4-11
4F - Create a New Dimension Style	4-14

Lesson 5

Create a Table	5-2
Insert a Table	5-6
Insert a Block into a Table Cell	5-7
Insert a Formula into a Table Cell	5-8
Modify an existing Table	5-10
Modify using grips	5-11
AutoFill grip	5-12
Table Breaking	5-14
Create a Field	5-15
Update a Field	5-16
Editing Fields	5-17
Add a Field to a Table Cell	5-17
Exercises	
5A—Create a Table	5-18
5B—Insert a Table	5-23
5C—Modify an existing Table	5-24
5D—Add Fields to an existing Table	5-25
5E—Update a Field	5-26
5F - AutoFill	5-27
5G - Table Breaking	5-28

Lesson 6

Isometric drawings	6-2
Isometric snap and grid	6-2
Isoplanes	6-2
Isometric Ellipse	6-3
Exercises	
6A - Isometric Assembly	6-4
6B - Isometric Object	6-5
6C - Abstract House	6-6

Lesson 7

Copy, Clip and Cut	7-2
Paste	7-3
Isometric text	7-5
Dimensioning an isometric drawing (Oblique)	7-6
Exercises	
7A - Oblique dimensioning-mechanical	7-7
7B - Oblique dimensioning-architectural	7-8
7C - Isometric Text	7-9

Lesson 8

Block	8-2
Creating-Review	8-2
Annotative	8-5
Inserting-Review	8-6
Attributes	8-7
Creating	8-7
Exercises	
8A – Assigning Attributes to a Block	8-11
8B - Assigning Attributes to Multiple Blocks	8-15

Lesson 9

Editing Attributes	9-2
Extract Data from Block Attributes	9-6
Exercise	
9A – Extracting Attributes to an AutoCAD table	9-12
9B – Extracting Attributes to an External File	9-13

Lesson 10

DesignCenter	10-2
Drag and Drop Blocks	10-4
Drag and Drop Layouts, Text Styles, etc.	10-5
AutoSeek	10-6
Exercise	
10A---Inserting Blocks from the Design Center	10-7
10B--- Borrowing settings from another drawing	10-9

Lesson 11

External Referenced drawings (XREF)	11-2
Inserting	11-3
Palette	11-5
Xbind	11-6
Clipping an External Referenced drawing	11-8
Clipping options	11-9
Edit an External Referenced drawing	11-10
Convert an object to a Viewport	11-13
Creating Multiple Viewports and Multiple Xrefs	11-14
Creating Multiple Viewports- A quick method	11-16
Exercises	
11A - Xref Multiple Drawings	11-17
11B – Creating Multi-scaled views	11-21
11C –Clipping an External Reference	11-23

Lesson 12

Ordinate dimensioning	12-2
Creating	12-3
Jog	12-4
Qdim and ordinate	12-5
Alternate units	12-6
Tolerances	12-7
Geometric tolerances	12-9
Geometric tolerances and Qleader	12-10
Datum feature symbol	12-11
Datum triangle	12-12
Typing Geometric Symbols	12-13
Exercises	
12A - Ordinate dimensioning	12-14
12B - Dual dimensioning	12-15
12C - Deviation & Symmetrical	12-16
12D - Limits	12-17
12E - Geometric tolerances	12-18

Lesson 13

Introduction to 3D	13-2
Enter the AutoCAD 3D Workspace	13-3
Tool Palette Display	13-4
Viewing a 3D model	13-5
ViewCube	13-6
3D Orbit	13-9
3D Views	13-10
Visual Styles	13-11
Wireframe	13-14
Surface model	13-15
Solid model	13-16
Exercises	
13A - Create a Wireframe Model	13-17
13B - Create a Surface Model	13-18

Lesson 14

Drawing basic geometric shapes	14-2
Exercises	
14A – Create 4 Solid Boxes	14-10
14B – Create 3 solid Cylinders	14-11
14C – Create 2 solid Cones	14-12
14D – Create 3 solid Wedges	14-13
14E – Create a solid Sphere	14-14
14F – Create 3 solid Torus'	14-15
14G - Create 2 solid Pyramids	14-16

Lesson 15

Configuring options for 3D	15-2
Understanding the UCS	15-3
Moving the UCS	15-4
Rotating the UCS	15-6
New direction for Z axis	15-7
Boolean Operations	15-8
Union	15-8
Subtract	15-9
Intersection	15-10
Exercises	
15A – Subtract	15-11
15B – Union and Subtract	15-13
15C – Assembling 3D solids	15-18

Lesson 16

Extrude	16-2
Region	16-5
Presspull	16-6
Polysolid	16-7
DELOBJ system variable	16-8
Plan View	16-9
Exercises	
16A – Extrude	16-10
16B – Extrude with taper	16-11
16C – Extrude along a Path	16-13
16D – Extrude a Region	16-14
16E – Extrude or Presspull a Region	16-15

Lesson 17

3D Operations	17-2
3D Mirror	17-2
3D Rotate	17-3
3D Align	17-4
3D Array	17-5
Exercises	
17A – 3D Mirror	17-7
17B – 3D Rotate	17-9
17C – 3D Align	17-10
17D – 2D Array	17-11
17E – 3D Array – Rectangular	17-12
17F – 3D Array – Polar	17-13

Lesson 18

3D Solids	18-2
Stretch using grips	18-2
Move using grips	18-4
Constrain movement	18-6
Exercises	
18A - Create a Cube	18-7
18B – Presspull or grips	18-8
18C – Add Cylinder and subtract	18-9
18D – Grips or 3D Move	18-10
18E – Properties, Grips or 3D offset	18-11
18F - Grips or 3D Delete	18-12

Lesson 19

Revolve	19-2
Slice	19-3
Section	19-4
Section Plane	19-5
Sweep	19-8
Helix	19-9
Exercises	
19A – Revolve	19-10
19B – Slice	19-12
19C –Section	19-13
19D –Create 2D and 3D Section	19-14
19E – Sweep	19-15
19F – Helix	19-16
19G – Solid Helix	19-17

Lesson 20

Plotting Multiple views	20-2
More Visual Styles	20-4
Shell	20-5
Exercises	
20A – Display a shaded view	20-6
20B - Shell	20-7

PROJECTS

Architectural
Electro-mechanical
Mechanical

APPENDICES

Appendix A. Add a Printer / Plotter
Appendix B. Metric Conversion Tables

INDEX
